

Warning

EV & Hybrid Vehicles: Use at Your Own Risk

The use of this car wash facility with an Electric Vehicle (EV) or Hybrid vehicle involves unique risks. Due to the high-voltage systems (HVS) in these vehicles, water intrusion or improper procedure can result in significant damage.

By entering this car wash, you, the vehicle owner/operator, acknowledge and agree to the following conditions:

1. Vehicle Condition

You confirm that your vehicle has no pre-existing damage that could compromise its seals or high-voltage systems. This includes, but is not limited to, damage from crashes, fires, or water/saltwater submersion. Do not use this car wash if your vehicle is damaged.

2. Owner's Manual Compliance

You are responsible for knowing and following your vehicle manufacturer's specific procedures for car washing. You confirm you have referenced your owner's manual and have placed the vehicle in the correct mode or setting for a car wash.

3. Secure Charging Port

You confirm that your vehicle's charging port door is fully and securely closed and sealed before starting the wash.

4. High-Pressure Wand Use

If using a high-pressure wand, you agree to avoid spraying sensitive areas directly, including the charging port, emblems, sensors, and panel gaps.

—

Assumption of Risk & Release of Liability

By proceeding with the wash, you fully assume all risks associated with washing your EV or Hybrid vehicle at this facility. You agree to release and hold harmless the U.S. Army, Army MWR, the Non-Appropriated Fund Instrumentality (NAFI), and their employees from any and all liability for any damage, loss, or injury to your vehicle or its components that may result from your use of this car wash, including damage related to water intrusion into the charging port, battery, or any part of the high-voltage system. Failure to follow manufacturer guidelines or washing a previously damaged vehicle is done at your sole risk.
